### Rainy Day Irrigation Tips

You may be watering too much if you still use the same watering schedule as last summer. The key to irrigation this time of year is to keep the soil moist to a depth of a few inches — but not wet. Experts advise buying an inexpensive rain gauge and leaving it exposed outside. If it measures half an inch or more the next time it rains, you can skip your next lawn-watering cycle. Find more smart water-saving ideas at [www.wateruseitwisely.com](http://www.wateruseitwisely.com).

### Fix a Leak Week: March 13–19

Did you know that fixing a household water leak can save as much as 10% on your water bill? Common leaks like worn toilet flappers, dripping faucets and leaking valves waste nearly 1 trillion gallons of water annually nationwide. Visit [smarthomewatguide.org](http://smarthomewatguide.org) for more tips on how to find and fix leaks that are draining your budget.

### OUR COMMITMENT TO QUALITY

EPCOR's water quality professionals perform safety tests daily, continually monitoring for 100+ regulated substances and contaminants. Year after year, the water in all our districts meets or exceeds stringent state and federal standards.

#### Sign Up for AutoPay Today

Paying your bill is easy with AutoPay, which links your bank account with your EPCOR customer account. Sign up online through your account portal or call us at 1-800-838-0834 and we'll help you get started.
