In February 2019, an EPCOR representative met with you and provided information about the Clover Bar Pipeline Construction project. Construction activities will start in March 2019 and will be completed in Fall 2019.

**Project overview**

EPCOR is replacing a section of existing pipeline approximately 2.5 km in length between the Gold Bar Wastewater Treatment Plant (GBWWTP) and the Clover Bar Lagoons (as shown by the blue line on the map below). This construction is occurring within established easements and is required to support the movement of wastewater byproducts from the GBWWTP to the Clover Bar Lagoons. There are several existing pipelines between GBWWTP and the Clover Bar Lagoons already in service. It has been determined that this proactive pipeline replacement is required to more effectively continue supporting ongoing operations at GBWWTP.

**Location of planned work**
Construction details

- **WATER SUPPLY:** There will be no interruption of your water or wastewater service.

- **HOURS OF OPERATION:** We anticipate the hours of work to be Monday to Friday from 7:00 a.m. to 5:00 p.m.; however, occasional evening and weekend work may be required.

- **SCHEDULE:** Mobilization within our existing easement has already been initiated. Construction and demobilization will be complete at the end of Fall 2019.

- **WHAT YOU MAY SEE:** Company vehicles, crews, equipment, a tandem truck, hydrovac trucks, excavators and an articulated trench roller. EPCOR will install temporary fencing and signage around the construction site.

- **NOISE:** This work will create typical noise associated with construction. We will comply with the City of Edmonton’s Community Standards Bylaw for Noise Control.

- **ROAD CLOSURES:** No road closures are anticipated as a result of this work. EPCOR will work with owners and stakeholders to maintain access and minimize traffic disruptions.

- **WORKSPACE:** EPCOR will work with landowners and stakeholders to determine required laydown areas and temporary work space requirements. Work areas will be safe and secure. All construction activities will be in accordance with the City of Edmonton’s bylaws, occupational health and safety requirements, as well as EPCOR’s health, safety and environment procedures and guidelines.

- **ENVIRONMENTAL IMPACTS:** In an effort to minimize the impact to the area, the amount of vegetation removal required for the project has been reduced to the extent possible. EPCOR will adhere to the City of Edmonton’s Corporate Tree Management Policy (C456A). The project will not impact any watercourses, wetlands or other waterbodies.

- **RECLAMATION:** Depending on how much material is recoverable/reusable, pipeline bedding/backfill materials and/or topsoil may be brought in for the project. Once construction is complete, excavations will be backfilled and the disturbed area will be reseeded using a City of Edmonton approved native grass mix.

- **PERMITS:** EPCOR is working with the City of Edmonton and all applicable Regulators to obtain the necessary approvals before construction is initiated.
