Re: Edmonton Carbon Capture, Utilization, and Storage (CCUS) Connection Project – Project Update

In March 2025 we sent out information on our Edmonton Carbon Capture, Utilization, and Storage (CCUS) Connection Project. This letter provides updated information on the transmission line route options and next steps in the process.

Project Background

To support Heidelberg Materials Canada Limited's (Heidelberg Materials) new net-zero cement production facility, EPCOR is proposing to construct a new 138 kilovolt (kV) single circuit, above-ground transmission line. This new transmission line would connect Heidelberg Materials' proposed new substation to an existing EPCOR transmission line (711L).

Project Status

On October 31, 2025, EPCOR submitted a Facility Application to the Alberta Utilities Commission (AUC) for the Project (AUC Proceeding No. 30409). Based on the assessments we have completed and the feedback received, we have selected a preferred and alternate route for the AUC's consideration. This project cannot proceed without approval from the AUC. The AUC recently sent out a notice of filing to provide more information on the next steps in the process, and the period to register a statement of intent to participate closes on December 23, 2025. This is an opportunity to provide feedback directly to the AUC, including route preferences. If the AUC approves this project, they will also select which route will be constructed. If approved, construction is planned to begin in May 2027. For additional information on preferred and alternate routes, see the map on page 2.

The AUC

Alberta's electrical system is regulated by the AUC. The AUC is an independent quasi-judicial agency that ensures that the delivery of Alberta's utility services takes place in a manner that is fair, responsible and in the public interest. For more information about how you can participate in the regulatory process, please refer to the enclosed AUC brochure *Participating in the AUC's independent review process to consider facility applications*, or visit the AUC website: www.auc.ab.ca.

Contact EPCOR

We continue to be available to answer questions and consider feedback on the project. For more information, please contact us:

Phone: 780-412-4200

Email: epcorprojects@epcor.com

Web: epcor.com/consultation

Heidelberg Materials

If you would like to learn more about the Heidelberg Materials project, please contact:

Brent Korobanik

Phone: 780-420-2500

Email: EdmontonCCUSinfo@heidelbergmaterials.com

FINAL PREFERRED AND ALTERNATE ROUTES

TELL US HOW WE DID

If you would like to provide your feedback, please access the survey at <https://www.surveymonkey.com/r/EPCORCCUS> or scan the QR code below with a mobile device. The survey will take approximately five minutes and will provide us with valuable feedback for future projects. The deadline to provide feedback is **January 9, 2026**.

Thank you.

EPCOR

EPCOR respects your privacy. Any personal information we collect about you, including your name, address, phone number, and e-mail address will only be used in regards to EPCOR projects, including electricity transmission and distribution, natural gas, water and drainage. For more information on EPCOR's Privacy Policy, please visit epcor.com. If you would like to opt out, please contact us at (780) 412-4200 or epcorprojects@epcor.com
