

Connection Impact Assessment (CIA) Fees

The table below provides a list of CIA fees based on applicable project type and size. The fees represent the cost of completing the CIA study only and do not reflect the total cost of connection work.

An estimate with instructions for payment will be sent to the customer once a CIA application has been received.

Please contact dxgeneration.eedo@epcor.com to verify the information is current.

Fees as of Jan 1, 2026:

CIA Category	Applicable Project Size ¹	EPCOR Fee Cost (\$) *	Hydro One Fee
Micro-DER	≤ 12 kW	No Charge	N/A
Small Projects	> 12 kW and ≤ 500 kW	3,575.00	To be Determined ^{2,6}
Medium Sized Projects	> 500 kW and ≤ 10 MW	9,250.00	To be Determined ²
Large Sized Projects	> 10 MW	12,500.00	To be Determined ²

**Please add 13% HST to all fees.*

Notes:

1. EPCOR's CIA fees are for all generation project types including load displacement, net metering and energy storage.
2. Hydro One fee details can be found at found at: [Hydro One CIA Fee](#)
3. CIA revisions will be charged 50% of the CIA costs listed in the table above.
4. Detailed Technical Connection Assessment may apply.
5. Projects greater than 10 MW also require a System Impact Assessment (SIA) to be completed by IESO. IESO - [Overview of the Connection Process](#)
6. The decision to apply a customer's application under an existing Threshold Allocation is entirely at EPCOR's discretion.
