

21,000

THAT'S THE NUMBER OF TESTS WE CONDUCT EVERY YEAR TO VERIFY AND PRESERVE THE QUALITY OF THE WATER YOU DRINK.

Every day, we're focused on water quality and safety, we test for state and federal standards, and we prepare to invest more in our precious infrastructure.

And every year, we publish a water quality report that provides details on the water in your service area. You can read yours anytime at epcor.com.

NOW AND INTO THE FUTURE

Keeping your water safe is about more than testing. It's also about operating a complex, fragile system. The American Society of Civil Engineers estimates that the nation needs more than \$1.7 trillion invested in its aging water infrastructure by 2050.

EPCOR is committed to the communities we serve today, and into the future. We've announced plans to invest more than \$500 million in the precious underground infrastructure that delivers water to homes, families, schools and businesses every day.
