

NOTICE OF AN APPLICATION BY EPCOR WATER (WEST) INC. PROPOSING TO INCREASE RATES EFFECTIVE JANUARY 1, 2018

Notice is hereby given that EPCOR Water (West) Inc. (EWW) has filed an application to the Deputy Comptroller of Water Rights for approval under the provisions of the Water Utility Act and the Utilities Commission Act of rates and charges for the period 2018-2020. In its application, EWW requests approval of adjustments to its water rates to recover EWW's forecast revenue requirements for the 2018-2020 period. The proposed adjustments to rates are required to enable the Utility to carry out its scheduled operating and capital programs for the 2018-2020 period. These operating activities and capital investment projects will allow the Utility to continue providing safe and reliable water service to its customers. The primary drivers for the proposed rate increases are: increased operational costs as newly completed wells go into service; maintaining existing infrastructure; and general inflation.

Rate riders applied in 2018 are also proposed to refund outstanding balances in EWW's deferral accounts for the 2015-2017 period. These deferral accounts were approved by Order No. 2420 dated May 26, 2015.

For a customer consuming 20 m³ per month, the impact of adjustments to the proposed rates and rate riders results is approximately \$4.50/month decrease in 2018, approximately \$0.75/month increase in 2019 and approximately \$0.40/month increase in 2020. A summary of the proposed rates and rate riders for 2018-2020 is provided here.

PROPOSED METERED RATES FOR 2018-2020

RESIDENTIAL UNITS – MONTHLY CHARGE

Note: Residential units billed quarterly
