COMMON FACILITIES HOOK-UP FEE

I. Purpose and Applicability

The purpose of the Common Facilities hook-up fee payable to EPCOR Water Arizona Inc. (“the Company”) pursuant to this tariff is to equitably apportion the costs of constructing additional common water facility infrastructure to provide water production, delivery, treatment, storage and pressure among all new service connections. These charges are applicable to all new service connections established after the effective date of this tariff. The charges are one-time charges and are payable as a condition to the Company’s establishment of service, as more particularly provided below.

II. Definitions

Unless the context otherwise requires, the definitions set forth in R-14-2-401 of the Arizona Corporation Commission’s (“Commission”) rules and regulations governing water utilities shall apply interpreting this tariff schedule.

“Applicant” means any party entering into an agreement with the Company for the installation of water facilities to serve new service connections, and may include developers and/or builders of new residential subdivisions.

“Main Extension Agreement” means any agreement whereby an Applicant, Developer and/or Builder agrees to advance the costs of the installation of water facilities, which may include Common Facilities, to the Company to serve new service connections, or install water facilities to serve new service connections and transfer ownership of such water facilities to the Company, in either case which agreement shall require the approval of the Commission pursuant to A.A.C. R-14-2-406, and shall have the same meaning as “Water Facilities Agreement” or “Line Extension Agreement.”

“Common Facilities” means all wells, storage tanks, production, treatment, booster pumps, pressure tanks, transmission mains and related appurtenances, including engineering and design costs, constructed for the benefit of the entire water system and not for the exclusive use of the Applicant’s development.

“Service Connection” means and includes all service connections for single-family residential or other uses, regardless of meter size.

LARGE WATER-USERS

Any development with a projected average daily water demand greater than 1,700 gallons per day per acre is considered to be a Large User. Large Users will be required to provide an additional renewable water supply source to Utility to meet the demands of the development that are greater than 1,700 gallons per day per acre. Examples of a renewable water supply source include surface water or a groundwater well with long-term storage credits. The renewable water supply source must be approved by Utility, and must have the appropriately allocated water rights that will be conveyed to Utility. The cost to provide a renewable water supply source to Utility will not be credited as an offset to the Common Facilities Hook-Up Fee because such costs will be due to the exclusive need for additional water by the Large User; however, the cost of that portion of a renewable water supply source that is in excess of the Large User's needs will be credited as an offset to the Common Facilities Hook-Up Fee.

Large Users may be required to enter into an agreement with Utility that will define terms and conditions, and will include fees that will be charged to Large Users for over usage. Fees will incur if Large Users use water in excess of the supply source provided, which will be reviewed by Utility on an annual basis. Continued excessive use could result in Utility requiring the Large User to develop and implement a water use reduction plan or, as a last resort, court action.

All usage per 1,000 gallons per month \$ 0.4358 *

* Rate consists of \$0.0000 per 1,000 gallons of usage to recover the over/under collection of prior years' surcharge and \$ 0.4358 per 1,000 gallons of usage for the collection of current power charges.

Terms and Conditions

All documentation to support the proposed surcharge will be included.

As part of each annual filing, the Company will perform a reconciliation for the prior reporting period comparing the amounts recovered from/refunded to customers to the amount of increase/decrease in power expenses due to changes in rates for that same period resulting in either an under / (over) recovery. This true-up will be included in the annual calculation.

The annual PCAM surcharge will be calculated based on the historic consumption of the applicable customers from the previous twelve months.

The revised PCAM surcharge will be effective on June 1 of each year.

The PCAM surcharge will appear on each applicable customer bill as a separate line item.

All rates in this Schedule shall be subject to their proportionate part of any taxes or other governmental imposts that are assessed directly or indirectly on the basis of revenues derived from this Schedule.
