*On September 1, 2016 the Phase 2 rates authorized by Decision 75268 became effective. The Company's billing system split September usage on a pro-rated basis and billed usage at the approved rates for the given timeframe. The basic charge was likewise pro-rated. Accordingly, the usage and bill counts for the prior and present rates are shown separately to allow for recalculation of present revenues. However, usage and bill counts shown in the consolidation factor table above do not make the same differentiation but materially provide the same full bill totals in the aggregate.

**On September 1, 2017 the Phase 3 rates authorized by decision 75268 become effective. The annualization adjusts revenues to present one full year at Phase 3 rates.

Proposed Revenues	\$ 24,433	\$ 2,105	\$ 3,947	\$ 11,259

Total Proposed Revenues	41,744
Proposed Increase	\$ (12,653)

*On September 1, 2016 the Phase 2 rates authorized by Decision 75268 became effective. The Company's billing system split September usage on a pro-rated basis and billed usage at the approved rates for the given timeframe. The basic charge was likewise pro-rated. Accordingly, the usage and bill counts for the prior and present rates are shown separately to allow for recalculation of present revenues. However, usage and bill counts shown in the consolidation factor table above do not make the same differentiation but materially provide the same full bill totals in the aggregate.

**On September 1, 2017 the Phase 3 rates authorized by decision 75268 become effective. The annualization adjusts revenues to present one full year at Phase 3 rates.

*On September 1, 2016 the Phase 2 rates authorized by Decision 75268 became effective. The Company's billing system split September usage on a pro-rated basis and billed usage at the approved rates for the given timeframe. The basic charge was likewise pro-rated. Accordingly, the usage and bill counts for the prior and present rates are shown separately to allow for recalculation of present revenues. However, usage and bill counts shown in the consolidation factor table above do not make the same differentiation but materially provide the same full bill totals in the aggregate.

**On September 1, 2017 the Phase 3 rates authorized by decision 75268 become effective. The annualization adjusts revenues to present one full year at Phase 3 rates.

*On September 1, 2016 the Phase 2 rates authorized by Decision 75268 became effective. The Company's billing system split September usage on a pro-rated basis and billed usage at the approved rates for the given timeframe. The basic charge was likewise pro-rated. Accordingly, the usage and bill counts for the prior and present rates are shown separately to allow for recalculation of present revenues. However, usage and bill counts shown in the consolidation factor table above do not make the same differentiation but materially provide the same full bill totals in the aggregate.

**On September 1, 2017 the Phase 3 rates authorized by decision 75268 become effective. The annualization adjusts revenues to present one full year at Phase 3 rates.
