

PROJECT UPDATE

Upgrades to the Garneau Substation

February 2024

WHAT'S HAPPENING

Last summer, we sent a notice regarding EPCOR's project to upgrade the Garneau Substation, located at 11123 85 Avenue NW.

Within the next three months we will be completing our work to upgrade the electrical equipment at the substation. The remaining work includes energizing the final transformer, maintenance work, installing crushed rock throughout the substation area, building sound enclosures around the transformers and building a permanent fence at the back alley.

After this work is completed, EPCOR will restore the site to its original condition.

SCHEDULE

This work will take approximately three months to complete, finishing in spring 2024. Work hours are Monday to Saturday, 7:00 a.m. – 5:00 p.m. with occasional Sundays from 9:00 a.m. – 5:00 p.m.

WHAT TO EXPECT

TRAFFIC IMPACTS: To safely complete this work, EPCOR may need to periodically close the alley directly behind the substation. We will work to keep alley closures as minimal as possible throughout the rest of construction.

When closed, pedestrian and vehicle traffic will not be able to pass through the alley, but access to parking and parking garages in the alley will be maintained on either side of the substation. Residents and visitors to the area will need to use either 112 Street or 111 Street to access the back alley.

POWER OUTAGES: No power outages are anticipated as part of this work.

CONSTRUCTION EQUIPMENT: Residents will experience noise typical to construction as various equipment and trucks are used for this work. Vehicles on site include EPCOR and contractor vehicles, fork trucks and flatbed trailers.

NOISE: This project may be noisy at times. We will comply with the City of Edmonton's Community Standards Bylaw for Noise Control. If it is necessary to temporarily exceed acceptable noise levels, we will work with the City of Edmonton to obtain the necessary permits.

WORKSPACE: All work areas will be safe and secure. All construction activities will be in accordance with the City of Edmonton bylaws, Occupational Health & Safety requirements, and EPCOR's strict health, safety and environment procedures and guidelines.
