Dear Stakeholder,

Re: Clover Bar Interconnection Project – Project Update

In February and June 2022, you received project information regarding the proposed above-ground electricity transmission line project – the Clover Bar Interconnection Project (the Project). You are receiving this letter to provide you with another Project Update.

Project Background

To support Air Products' proposed new net-zero hydrogen production facility, EPCOR is proposing to construct a new 240-kilovolt single circuit, above-ground transmission line from the existing EPCOR-owned Clover Bar Substation to a proposed new substation which will be owned and operated by Air Products. The new transmission line will connect the proposed Air Products' substation to the electrical system.

Project Status

On October 13, 2022, EPCOR submitted a Facility Application to the Alberta Utilities Commission (AUC) for the Project (AUC Proceeding No. 27676). EPCOR submitted a preferred and alternate route for the transmission line, for the AUC to consider. Before EPCOR can commence construction work, an approval from the AUC is required. Only one route will be approved and constructed. If approved, construction is planned to commence in Spring/Summer 2023.

The AUC

Alberta's electrical system is regulated by the AUC. The AUC is an independent quasi-judicial agency that ensures that the delivery of Alberta's utility services takes place in a manner that is fair, responsible and in the public interest. For more information about how you can participate in the regulatory process, please refer to the enclosed AUC brochure *Participating in the AUC's independent review process to consider facility applications*, or visit the AUC website: www.auc.ab.ca.

For more information about the Project, please contact EPCOR Consultation at 780-412-4040, email Consultation@epcor.com or refer to the project webpage at epcor.com/consultation.

We would also like your feedback on EPCOR Consultation efforts for the Project. If you would like to provide your feedback, please access the survey at <https://www.surveymonkey.com/r/XR63WV5> or scan the QR code below with a mobile device. The survey will take approximately five minutes and will provide EPCOR Consultation with valuable feedback for future consultation efforts.

Thank you,
