Meter Size and Location Request Form

EPCOR Natural Gas Limited Partnership

Service Line and Meter Location Costs

EPCOR shall complete a construction estimate for the work required to install the natural gas service lateral extending from the property line to the meter location selected by the Company. The minimum fee for installation of a natural gas Service Lateral is outlined in EPCOR's Schedule of Miscellaneous and Service Charges included in its Rate Schedules and includes up to 20 meters of pipe. Additional fees may be charged if the length of pipe required to bring the Service Lateral to the Meter location exceeds the 20 meter length EPCOR uses to set this fee.

EPCOR will determine the location at which the service will enter a building with the normal point of entry being through the wall nearest to the gas manifold. The Company may, at its sole discretion, accommodate requests made by an applicant regarding the location of the service or other specific requirements and in such cases the applicant will be responsible for any additional costs associated with the request.

All fees for the service lateral installation must be paid in full before EPCOR will commence work on the installation. If the customer at the premises does not have any natural gas consumption within 12 months of installation of a new gas service, the owner will be required to reimburse EPCOR for any service line installation costs not covered by the service lateral installation fee charged at the time of installation.
